REASONS FOR ALLOWANCE

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

References Kou (5,402,424), Premerlani (5,958,060) and Ohdachi

(6,230,021) are cited because they are pertinent to the claim invention.

Regarding to claim 1, none of the prior art of record teaches or suggests
"the reference clock comprising means for generating a time stamp
signal and means for sending the time stamp signal over the asynchronous
data transmission connection from the network element to the base station;
and

the base station comprising means for receiving the time stamp signal
sent over the asynchronous data transmission connection, means for
calculating on the basis of the received time stamp signal how much the time
by the local clock at the base station deviates from the time by the reference
clock, means for generating a speed correction factor for the local clock on the
basis of at least one calculated deviation, means for correcting the running of
the local clock with the speed correction factor, and a frequency synthesizer

for generating the frequencies needed at the base station by using the local clock corrected with the speed correction factor”, It would not have been obvious for a person skilled in the art to combine Kou or Premerlani or Ohdachi with other prior art of record in order to arrive at the claimed invention.

Regarding to claim 6, none of the prior art of record teaches or suggests

“A method for performing frequency synchronization of a base station in a cellular radio network with calculating on the basis of the transferred time stamp signal how much the time by the local clock at the base station deviates from the time by the reference clock;

generating a speed correction factor for the local clock on the basis of at least one calculated deviation;

correcting the running of the local clock with the speed correction factor ;
and

generating the frequencies needed at the base station by using the local clock corrected with the speed correction factor”, It would not have been obvious for a person skilled in the art to combine Kou or Premerlani or Ohdachi with other prior art of record in order to arrive at the claimed invention.
